

CLEANING_FIN – STANDARD OPERATING PROCEDURE (README)

=====

Project: cleaning_fin
Location: /Users/kavinsampath/Developer/cleaning_fin
Last Updated: 2026-04-26

1. OVERVIEW

This document is the SOP / README for the cleaning_fin project. It explains where the project lives on disk and how to open the folder from macOS Finder.

2. PROJECT LOCATION

Absolute path:
/Users/kavinsampath/Developer/cleaning_fin

Parent folder (in Finder sidebar terms):
Macintosh HD > Users > kavinsampath > Developer > cleaning_fin

3. HOW TO ACCESS THIS FOLDER FROM FINDER

Method A – "Go to Folder" shortcut (fastest)

1. Click the Finder icon in the Dock to make Finder the active app.
2. Press Command + Shift + G (Cmd + Shift + G).
3. In the "Go to Folder" dialog that appears, paste:
/Users/kavinsampath/Developer/cleaning_fin
4. Press Return. Finder opens the cleaning_fin folder.

Method B – Navigate manually from the Home folder

1. Open Finder.
2. From the menu bar choose: Go > Home (or press Cmd + Shift + H).
3. Open the "Developer" folder.
4. Open the "cleaning_fin" folder.

Method C – Open from Terminal

1. Open the Terminal app (Applications > Utilities > Terminal).
2. Run:
open /Users/kavinsampath/Developer/cleaning_fin
3. Finder opens the folder in a new window.

Method D – Add to Finder Sidebar (one-time setup, then one click forever)

1. Use Method A or B to open the cleaning_fin folder in Finder.
2. Drag the folder icon from the Finder window's title bar (or from its parent folder) into the Favorites section of the Finder sidebar.
3. From now on, click "cleaning_fin" in the sidebar to open it instantly.

4. TIPS

- To reveal the folder in Finder from a Terminal that is already inside it:
open .
- To copy the path quickly: in Finder, select the folder, press
Cmd + Option + C, then paste anywhere.
- To show hidden files (e.g., .expo) in Finder: press Cmd + Shift + . (period)

.

5. CONTENTS AT A GLANCE

App.js	- App entry point
app.json	- Expo configuration
babel.config.js	- Babel configuration
package.json	- Dependencies and scripts
components/	- Reusable UI components
context/	- React context providers
data/	- Static / seed data
ios/	- iOS native project
navigation/	- Navigation configuration
notifications/	- Notification logic
screens/	- Application screens
storage/	- Persistence helpers
theme.js	- Theme / styling constants
utils/	- Utility functions
node_modules/	- Installed dependencies (do not edit)
